PROFILE

Software engineer with more than six years of experience in web and mobile development, from design to deployment. Passionate about AI and new technologies.

EDUCATION

INSA Lyon

Software Engineer Degree

Lyon, France

Sep. 2019 – Sep. 2022

EXPERIENCE

Software Engineer

Amadeus

Oct. 2022 – Jan. 2024

France

- Maintained a train reservation management application with critical requirements in an English-speaking, international environment
- Worked within an agile (Scrum) team to deliver features under strict reliability and performance and security constraints

Engineer Apprentice

EDF

Sep. 2019 – Sep. 2022

France

- Conducted stakeholder interviews (HR, IT security, managers) to gather requirements and authored the full functional specification for a provider access-management application
- Designed and developed a full-stack web application to centralize, for each external provider, their assigned material resources (computer, badge) and their permissions across internal applications
- Gave managers and IT security a 360° view of each provider's access rights, streamlining onboarding and enabling systematic identification and revocation of all resources upon departure

FREELANCE PROJECTS

Leccole | *School Management App*

Feb. 2026 – Present

- Built an application for managing enrollment, payments, grades, class schedules, and school accounting
- **Stack:** Next.js, PostgreSQL (Neon), Prisma, Resend, better-auth
- leccole.com

Flow-compta | *Purchasing Cooperative Management App*

Oct. 2024 – Dec. 2024

- Built an application to generate quotes from forms, invoices, purchase orders, and delivery notes, and to track payments
- Implemented file storage with Backblaze and transactional emails with Resend; in production and used by Africa Globale Services & Supply since December 2024
- **Stack:** Next.js, TanStack Query, Tailwind CSS, Zustand, Node.js/Express, MongoDB
- flow-compta.com

Kaidi | *Desktop Document Generation App*

Apr. 2026 – June 2026

- Built a cross-platform desktop application to generate documents from Word and Excel templates containing variables, used by three training centers to generate certificates
- Set up CI/CD pipelines with GitHub Actions to build and deploy the executables to Cloudflare R2
- **Stack:** Electron, SQLite, Next.js, Neon, better-auth, Shadcn UI
- kaidi.diaksdev.com

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, React Native

Backend: Node.js, Express, Hono

Databases: PostgreSQL, MySQL, MongoDB

Tools & Practices: Git, Docker, GitHub Actions, Dokploy, Agile/Scrum methods

Other: Artificial Intelligence (AI)
